

November 25th and 26th, 2023
USP - Campus Butantã

GambiConf 2023 - Media Kit

What is GambiConf?

GambiConf is an unusual and exciting conference made for those looking for a unique experience in the tech world. Unlike other conferences, GambiConf focuses on out of the box ideas and projects, encouraging creativity, curiosity, and exploration.

Here, you'll find people who love to share their most fun and innovative works related to computing, ranging from personal side projects to unexpected solutions for real-world problems. It doesn't matter if you are looking for how to build a computer using water, how to run classic games in unexpected environments, or want to go deep in curious topics related to computing - GambiConf offers a friendly place that will expand your horizons and unlock new skills.

Join us and discover a new world of possibilities at GambiConf!

GambiConf 2022 was in Lisbon...

The GambiConf 2022 edition, held in Lisboa, Portugal, was an international event that brought together hackers and technology enthusiasts from different countries of the European Union. Featuring sessions in English, the conference provided an environment for exchanging knowledge and ideas between participants from different backgrounds.

The speakers presented on many interesting and disruptive areas, including, but not limited to; mutation testing, reverse engineering, compilers, and much more. This diversity of topics and the participation of highly-skilled professionals contributed to making GambiConf an enriching and inspiring experience for all involved.

Including both 2021 and 2022 editions:

+200 attendees

+56 h. content length

35 talks

+6650 plays

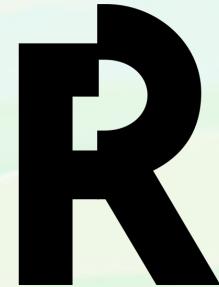

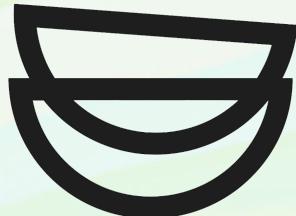

Why sponsor Gambiconf?

GambiConf isn't about a specific technology or product. Instead, its focus is to bring hackers – those who love the sublime art of computing – together. That's it. We are not just an event, but also a community of people who love learning and exploring limits, and want to share the findings of our unique projects.

Despite its uniqueness, the content presented at the conference is of the best quality. When sponsoring GambiConf you are not only helping us to make this dream possible but also putting your brand in touch with this community of brilliant and creative people.

GambiConf 2023 will be in São Paulo...

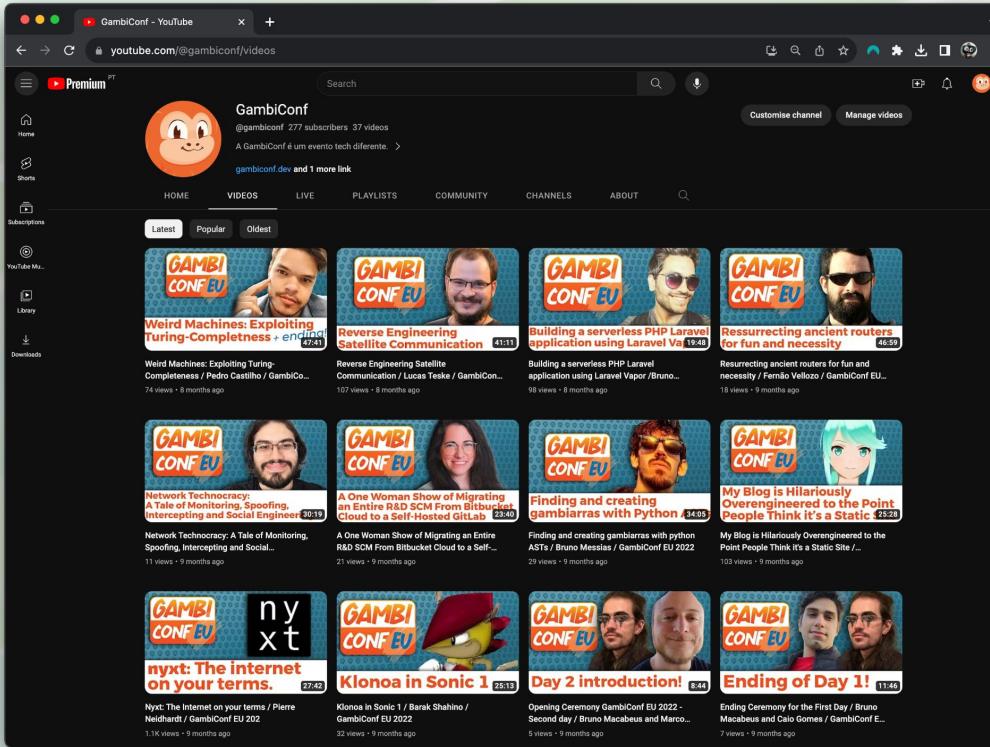

The third GambiConf edition, which will happen in 2023, is set to be a significant milestone by being hosted at the University of São Paulo (USP) in partnership with CodeLab. USP is one of the highest-ranked universities in Latin America and this partnership brings immense value to the whole event, allowing us to be closer to professors, researchers, and students who are at the edge of technology.

Hosting the conference in Brazil also gives us room to promote the development of the local technology community, as well as to highlight the country's innovations and achievements. This edition will certainly contribute to strengthening the national technological scene and expanding the reach of the event beyond borders.
